Cessation of Fluctuations of Consciousness

Citta vritti nirodha

Disruption of Consciousness entanglement with the environment

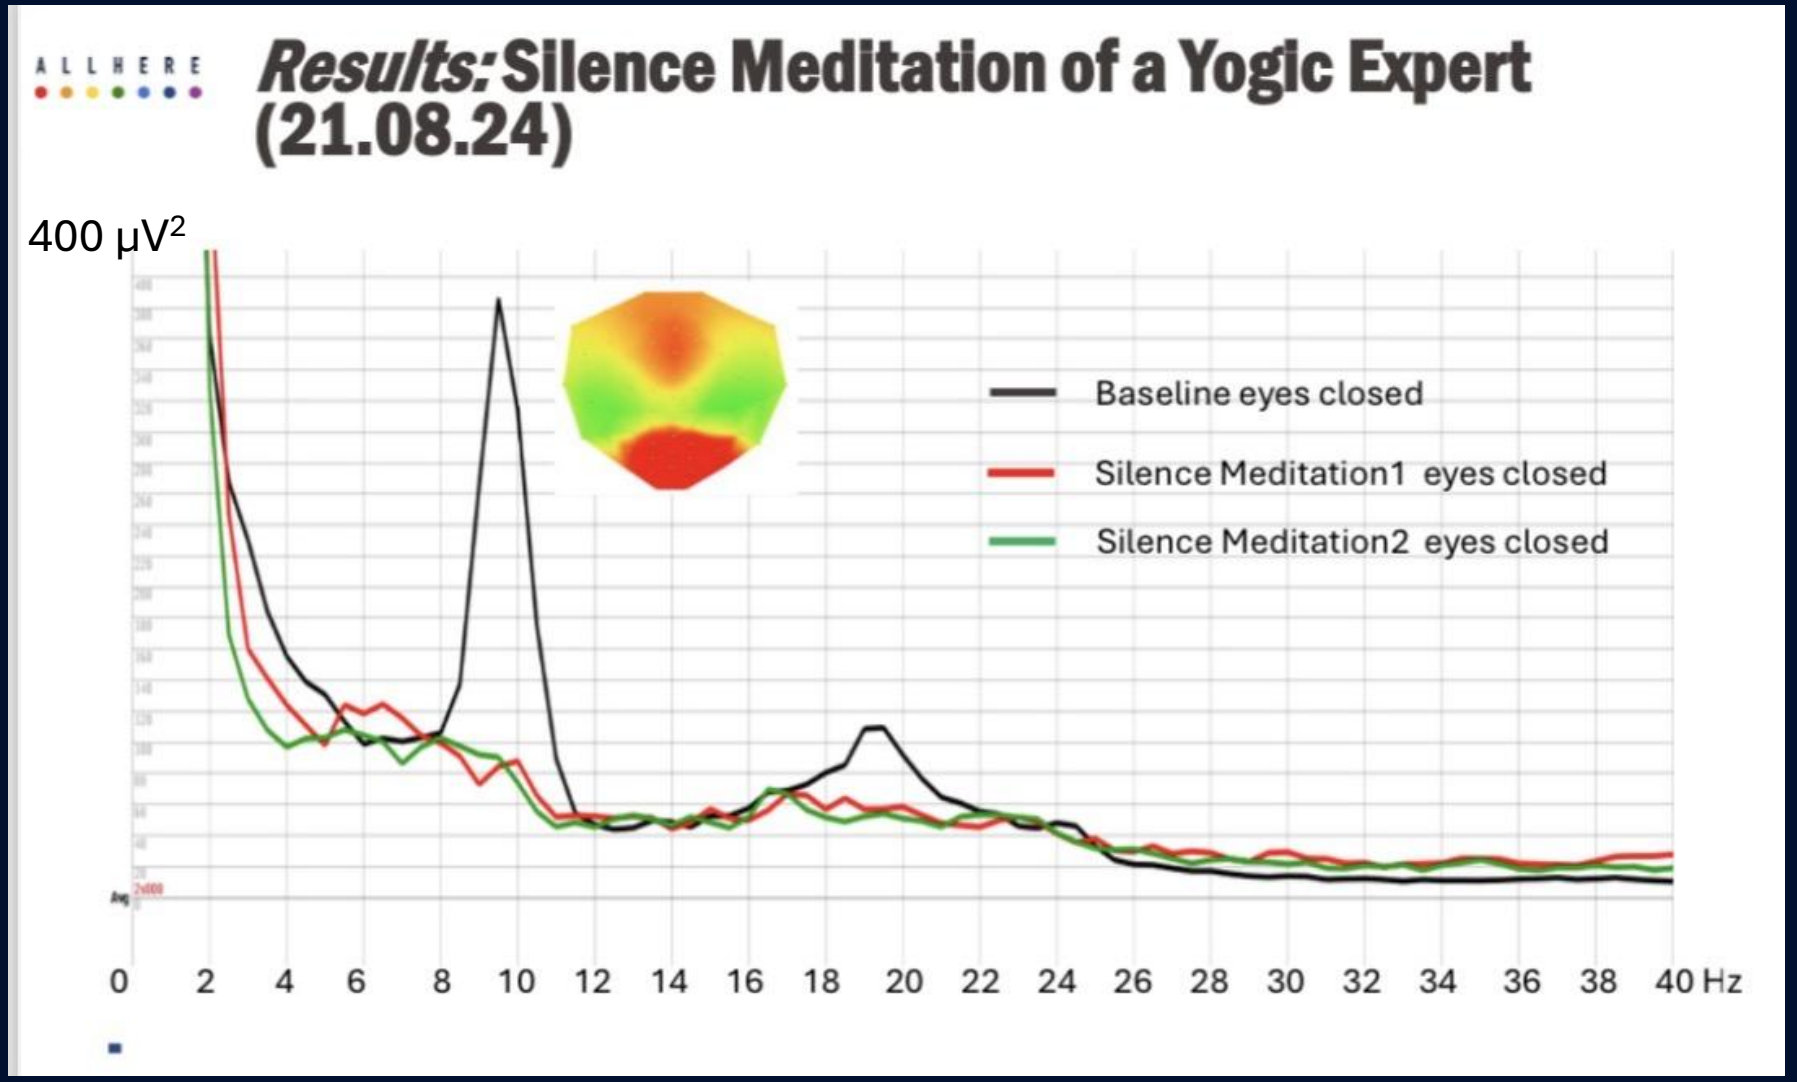

What we observe:

Cessation of Ordinary Brain Wave Dominance

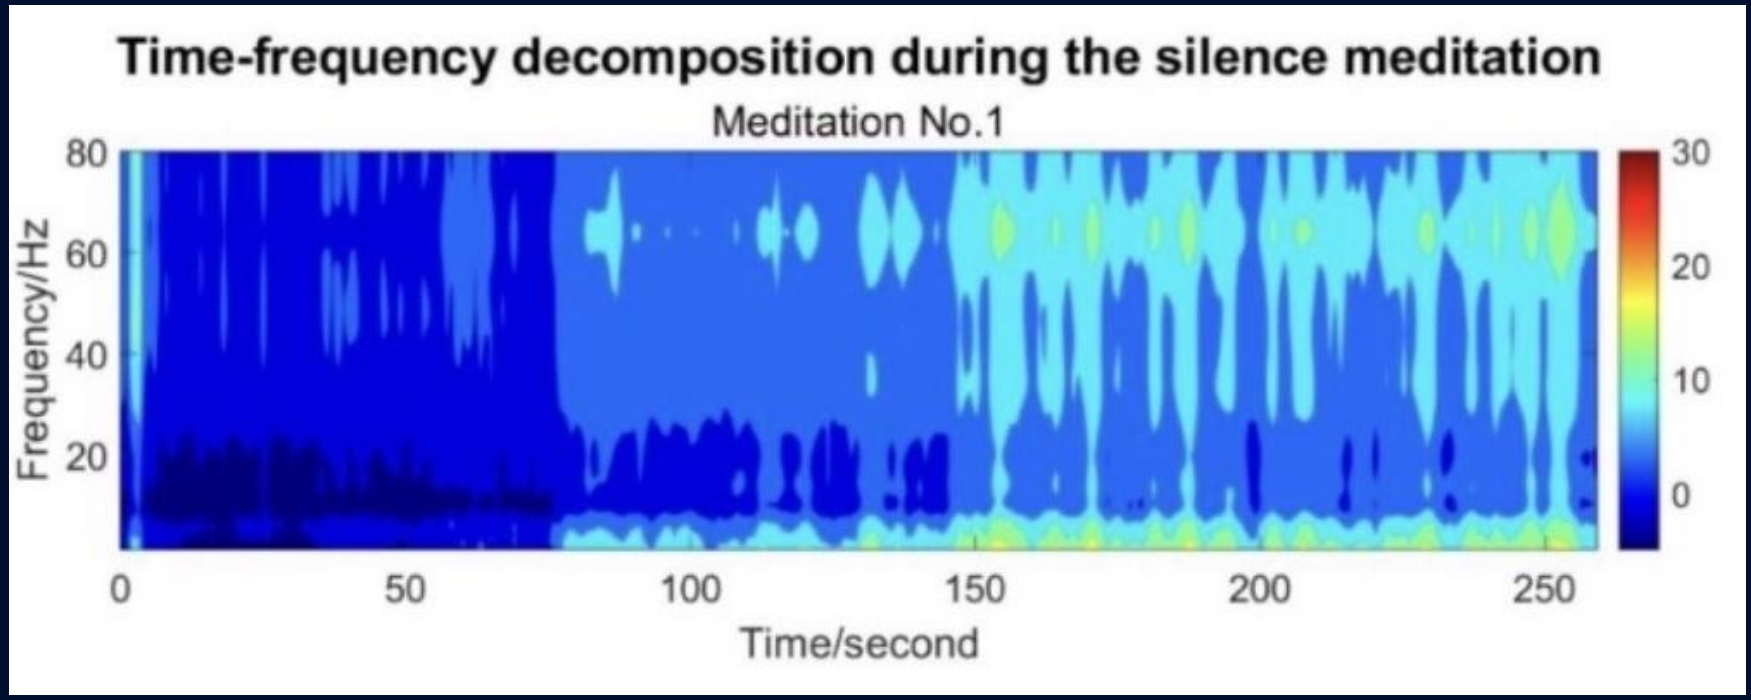

Ngo et al., 2026

Suppression of the Ordinary brain waves

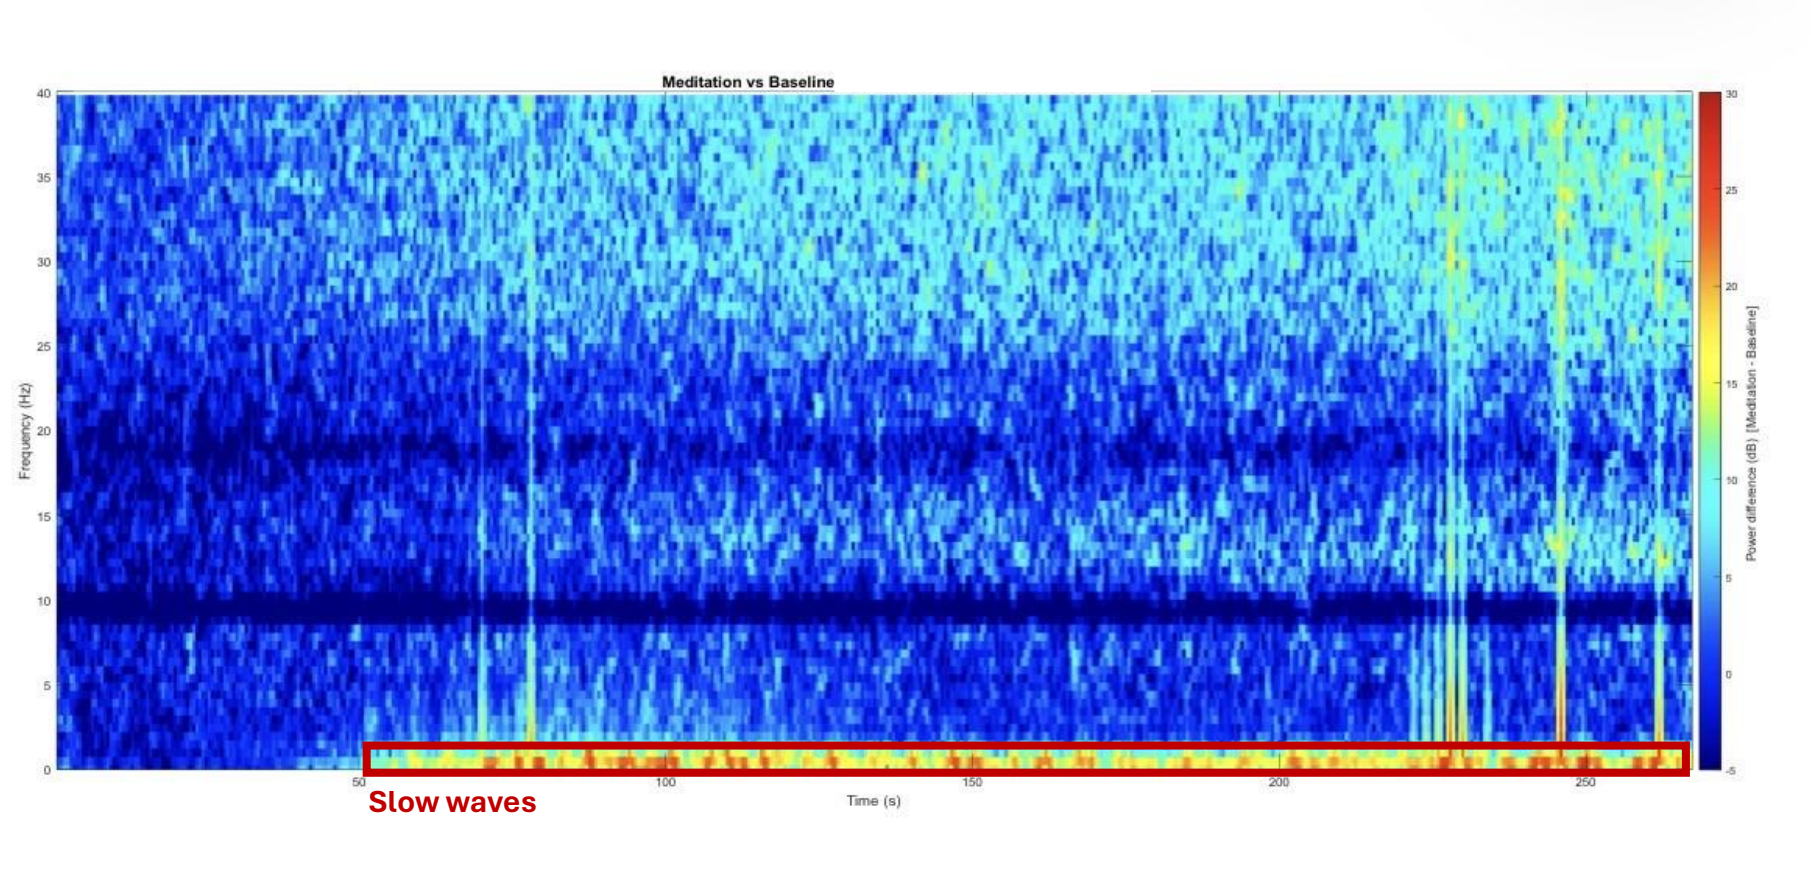

Ngo et al., 2026

It’s not about delta, theta, alpha, beta, gamma - it’s the absence of any single brain wave dominance.

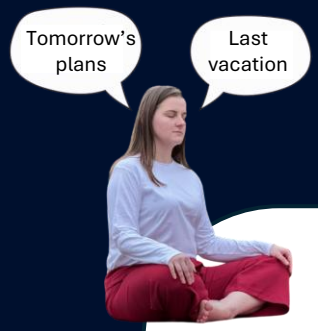

Ngo et al., 2026

Stabilized Consciousness: Infra Slow waves

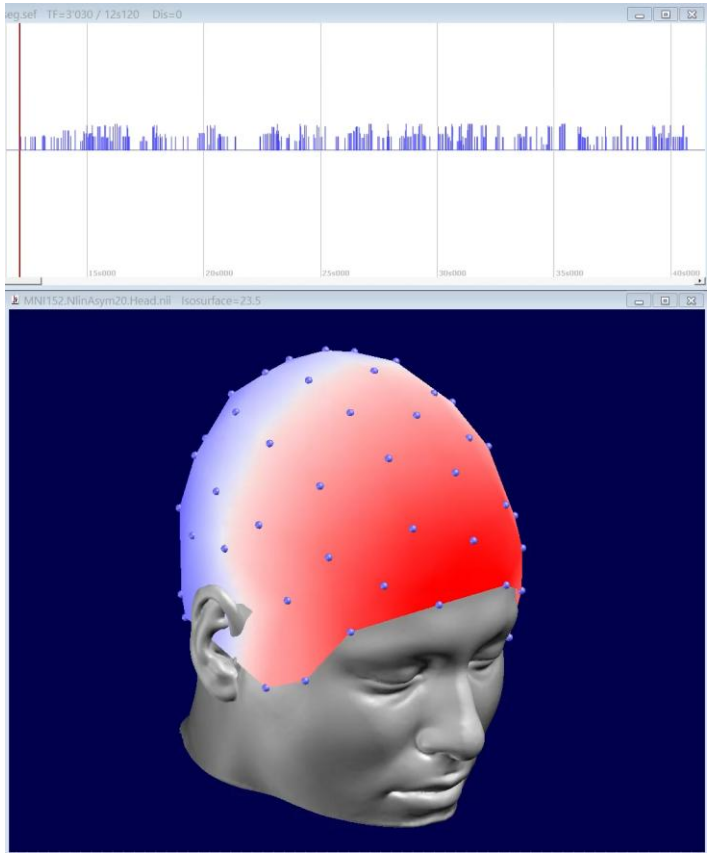

Ngo et al., 2026

Stable & Extended Microstate, the Stabilized Atom of Thought

RESTING STATE

(Eyes closed, relaxed)

MIND CHATTER - MONKEY MIND

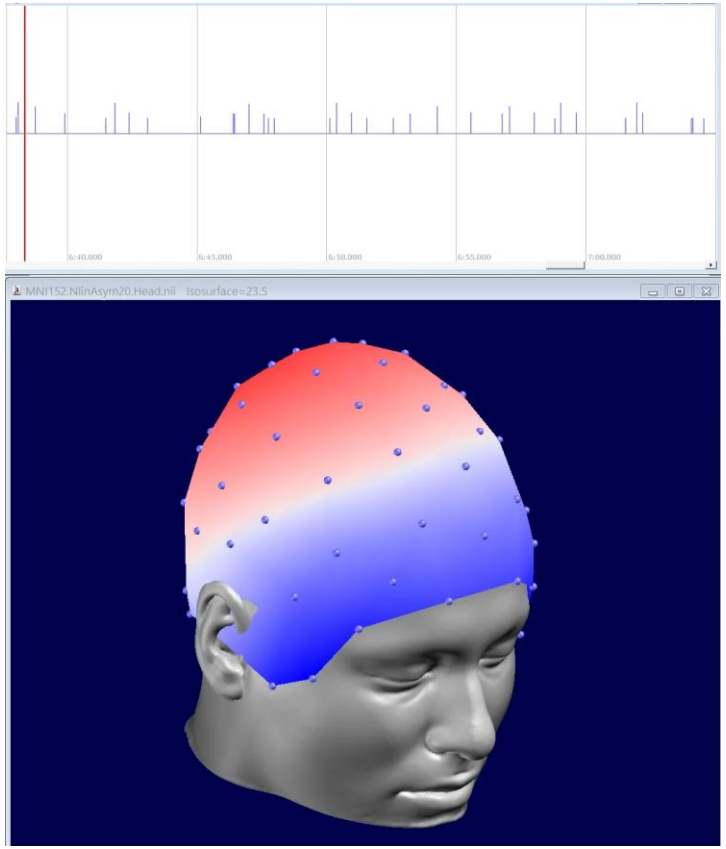

Meditation

Your brain stays in just a few states for much longer periods

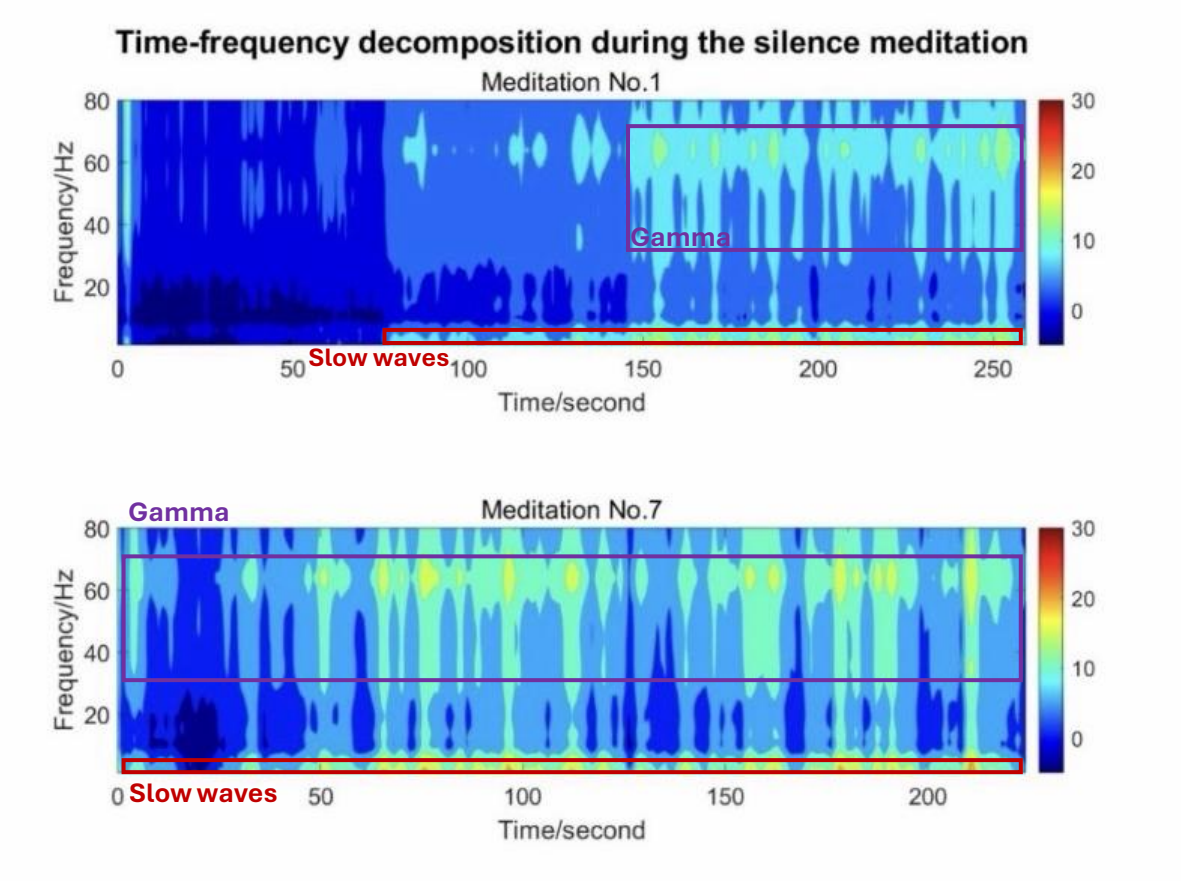

DEEP MEDITATION

(Deep meditative state, Stable mind)

THE STABILITY OF THE MIND

Wakeful & Alert Consciousness despite the Absorption & Slow Waves

Ngo et al., 2026

Cross-frequency combination: Two neural states at once: Slow & Fast

ALLHERE

Slow waves

Deep, embodied states of meditation

Gamma waves

Reflects wakeful awareness

Ngo et al., 2026

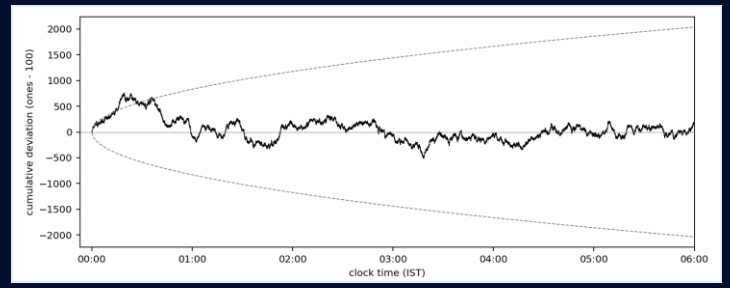

Transition to Non-entangled consciousness and experiments with quantum based REGs

ALLHERE

PILOT STUDY · INDIA 2026

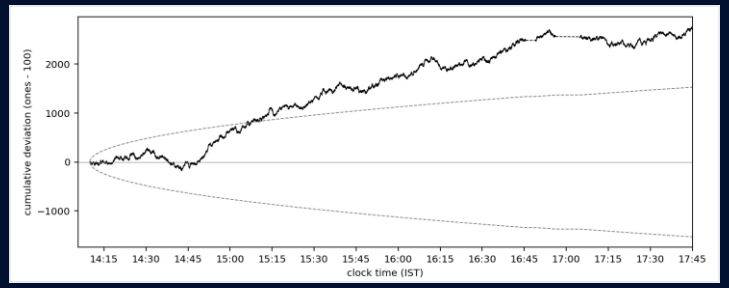

Cumulative deviation of a quantum REG placed in the meditation hall

CONTROL

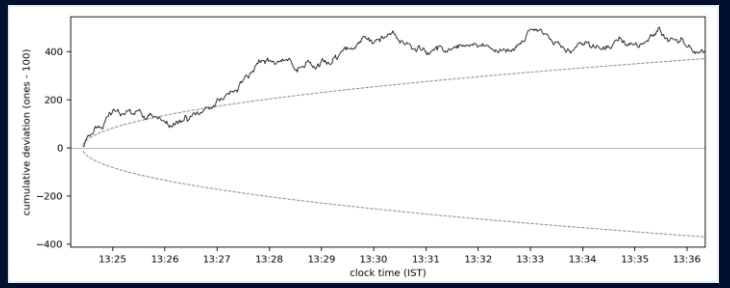

n = 21,600 · z = +0.14 · p = 0.888
27 Sep 2026 · 00:00–06:00 IST

GROUP MEDITATION

n = 12,174 · z = +3.48 · p = 0.0005
25 Sep 2026 · 14:10–17:45 IST

PRACTICE

n = 715 · z = +2.12 · p = 0.034
22 May 2026 · 13:24–13:36 IST

Psyleron REG · 200-bit trials at 1 per second · curve = running sum of (ones − 100) · grey dashed = ±1.96 chance band · method after Mason, Patterson & Radin (2007)
