Imagination between reality and description
Bashaer Faisal Banjabi – Saudi Arabia
Independent Researcher
introduction
What is the imagination looks like ?
It's the important part in the brain ,it's job like serve human and in this poster , am working to bring a drop from the imagination sea to be clear on how it's work, what are the relationship between it and between the mental health , what the effects and how we deal with it as a psychotherapy !
Solutions to this problems
To avoid Detached from reality negatively effects th
brain in general and imagination in particular , ignor
Alcohol, Drags , the science of energy and occultism
Which Islam religion ignore them too ..
To avoid misunderstanding input output we can use
the theory of imagination .which posits the followi
experiment
Describe imagination
-it's a space in the right side of the brain which human used to be creative or psycho and to go deeply in these two paths , we will explain the imagination problems , solutions and how could we deal with it as a psychotherapy
Requires audience participation
If you Couldn't make the one mentally picture , pl
complete the graph :
Yes
No

Imagination problems
- Detached from reality
- Misunderstanding input output
Reality of imagination
After explain the problems ,solution and participating in the clinical trial we can see the psychotherapy
points :
- Wrong input output and negative outcome effects = incorrect or unhealthy mental images
- Imagination built upon a scientific foundation and linked to other brain functions = a creative mind
- We can control our mental images by knowing the logical and unlogic from them

reality and description
njabi – Saudi Arabia
nt Researcher
Solutions to this problems
To avoid Detached from reality negatively effects the brain in general and imagination in particular , ignore Alcohol, Drags , the science of energy and occultism Which Islam religion ignore them too ..
To avoid misunderstanding input output we can use the theory of imagination ,which posts the following experiment
Requires audience participation
If you Couldn't make the one mentally picture , please complete the graph :
Yes
No
ating in the clinical trial we can see the psychotherapy
ects = incorrect or unhealthy mental images
n and linked to other brain functions = a creative mind
g the logical and unlogic from them
